

collaboration vizlib

The only seamless full-cycle collaboration solution for Qlik Sense to action your data.

July Sales

Carlos Juaquin 5/15/2019, 7:58:09 PM
Recap on the leadup to the summer months based on these selections guys?
2 Replies Last Reply: 5/15/2019, 8:43:04 PM

Danny Vasques 5/15/2019, 9:25:23 PM
Not bad at all! Sales was over our estimate by 17% in Europe in general, this was mostly over the June-July period as you can see.

Jenny Sutton 5/20/2019, 4:14:37 PM
May numbers look low though, Mark can you check it out and let me know what you think?

Mark Newton
I see what you mean, look at these selections, it seems to be because of the delayed product release that month.

collaboration vizlib

Harness the power of collaborative analytics and writeback capabilities to action, edit and capture your data in Qlik Sense.

Vizlib Collaboration is the most comprehensive full-cycle collaboration layer for your analytics solutions. It's designed to support your entire insights-to-action journey in Qlik Sense: from team discussions and insight sharing in real-time to workflows and data adding and editing on the fly.

Writeback capabilities empower you to go beyond just reporting in Qlik—you're now able to close the analytics loop by linking up your business tools and streamlining your workflows.

Enterprise on-premise version available.

Benefits of Collaboration in Qlik Sense

Avoid a disconnect and cut down the time wasted on taking screenshots or manually exporting reports – monitor, discuss and analyse data as a team without leaving Qlik Sense™.

With Collaboration Workflows, you have the opportunity to streamline key business processes in Qlik Sense. You can quickly define your own business processes, such as a management approval workflow, and action insights directly in your Qlik apps.

Accelerate insight sharing within the team – find answers to your questions almost instantly and make them accessible to everyone else on the team through a host of advanced features like bookmark sharing, comment categories, threaded conversations and workflows.

Remove communication roadblocks and keep the business moving by getting quick answers from colleagues via email and business chat software.

Vizlib Teamwork is all about collective intelligence and bringing your team and data together in Qlik Sense. Users can easily kick-off discussions right in their dashboards, call attention to interesting data points with contextualised comments and share their view of data with other people on the team. With in-context communication and real-time conversations inside your dashboards, teams can ask and answer questions in minutes, saving time and making better decisions.

Read-only dashboards are a thing of the past. With the Vizlib Writeback Table, you can easily edit, update and comment on data points or entire rows directly in your dashboards, while remaining in the analysis flow. It's a little like spreadsheets in Qlik Sense, but a lot more powerful, as it lets you correct your data, insert new information, adjust numbers and create new data segmentations. Fully customisable, Vizlib Writeback Table lets you edit Qlik dimensions and measures and seamlessly add new data using dropdowns, free text fields, radio buttons, date pickers, tags and many more options.

Vizlib Input Form lets you capture user input and enter new data points into your published Qlik Sense apps. And connecting to endpoints using REST, the Vizlib Form can send dynamic data to almost any business tool from another system, like your CRM, to email or Slack or an output file (like .csv or .qvf). Using a range of classic data input types, you can design your own custom and fully branded data input form to blend in with your dashboards.

Enjoy enterprise-grade multi-tiered security control with a range of options such as advanced user management, permissions and support for multiple SQL databases. Vizlib Server also includes stream and value access, Control app, and secure on-premise deployment.

Vizlib Teamwork

Data exploration is a collaborative team effort. Leverage our integrated commentary and messaging capabilities to fuel data conversations where your dashboards live.

With integrated workflows, comment categories, threaded replies, notifications and built-in sharing features, your team can seamlessly build off of each other's insights and keep the business moving forward.

The screenshot displays the 'Vizlib Collaboration Simple' interface. The main dashboard area is titled 'Analysis' and contains several data visualizations:

- Sales Variation:** YTD \$36.17M LYTD \$36.88M. Sales Variation: -1.71%.
- Margin Variation:** YTD \$15.85M LYTD \$15.52M. Sales Margin Variation: 2.13%.
- Sales vs Goal YTD:** Budget YTD \$39.44M LYTD \$36.17M. Sales vs Goal: -8.29%.
- Daily Sales:** A bar chart comparing sales for 2013 and 2014, with values around 800M.
- Sales: YTD vs LYTD vs YTD Goals:** A bar chart comparing sales across regions: Canada, Central, International, Northeast, Southern, and Western. The y-axis ranges from \$0 to \$20,000,000.

On the right side, there is a 'July Sales' chat window with several messages:

- Carlos Juaquin:** 5/15/2019, 7:50:09 PM. Recap on the leadup to the summer months based on these selections guys?
- Danny Vasques:** 5/15/2019, 9:25:23 PM. Not bad at all! Sales was over our estimate by 17% in Europe in general, this was mostly over the June-July period as you can see.
- Jenny Sutton:** 5/28/2019, 4:14:37 PM. May numbers look low though, Mark can you check it out and let me know what you think?
- Mark Newton:** 5/21/2019, 11:49:56 AM. I see what you mean, look at these selections, it seems to be because of the delayed product release that month.
- Jake Sanchez:** 5/21/2019, 1:24:23 PM. Look at how June and July spiked though! Social media interaction was through the roof in the younger age ranges, well done to the guys in social!
- Adrian Thomas - Hartley:** 5/22/2019, 5:47:51 PM. Seems to have been worth the wait, the delay was due to the lower marketing budget but given the circumstances I think it played out well, sales figures are still holding strong!

The interface also includes a user list on the left, a search bar, and various navigation and sharing icons.

Integrated Approval Workflows

Create your own custom workflows to automate business processes in Qlik Sense. Users can request to review, approve, reject or delegate tasks without leaving their dashboard, making team collaboration even more efficient and streamlined. Plus, you can define and tailor your workflows to every Collaboration Stream to recreate the decision-making process with enterprise-level permissions control and user management.

The screenshot shows the "Workflows" configuration page in Qlik Sense. At the top right, there is a "Restart" button. Below it, the "Workflows" section is expanded to show a "Simple Workflow" configuration. The workflow is titled "Simple Workflow" and has a list of states:

State	Color	Icon	Default	Visibility ?	Remove
Under Review	Blue	Question mark	Selected (blue circle)	Limited	X
Approved	Green	Checkmark	Not selected (white circle)	All	X
Rejected	Red	Red X	Not selected (white circle)	Limited	X

At the bottom of the workflow configuration, there are two buttons: "Add State" and "Manage Roles". Below the workflow configuration, there are two more buttons: "Add Workflow" and "Remove Selected Workflows".

Contextualised Discussions

Add comments on filtered data, individual charts or the entire sheet to kick off the discussion or meet a critical collaboration need, like reporting on data quality issues to a support team. You can also add images and (for Teamwork V3 and above) even a dataset in XLS format.

Please take a look at this trend - looks interesting.

 **Jonathan Israel** 20/04/2020, 19:44:07
I think if you have Amalia in the numbers it would look a LOT different

 **Martin Mahler** 20/04/2020, 19:49:52
We agreed to exclude her in Central & International. Last week's Monthly Sales Meeting FYI. *(edited)*

 **Jonathan Israel** 20/04/2020, 19:50:44
I was on holiday last week, I must not have gotten the memo- Thanks!

 **Josh Warbington** 20/04/2020, 19:51:07
Thanks Martin. I think we might want to look deeper into January, June, and July. The numbers are looking great!

Writeback data 🔒

Eliminate spreadsheet risk

Still relying on spreadsheets and shared files that have no version control or audit trails to collect and collate the latest data? Vizlib Writeback Table enables you to skip the error-prone manual steps required for maintaining multiple spreadsheets and work with your data directly in Qlik Sense. From governance chaos to a single source of truth!

Use our new 'smart' dropdowns to configure your table, and massively reduce the chance of any data entry errors.

Governed Management of Mapping Tables

The interface shows a navigation bar with options: Add user, Add Users, Update Users (selected), Delete Users, and Overwrite Users Table. Below this is a section titled 'Update QVD rows' with a table for user management.

userid	userDirectory	userName
joe@vizlib.com	VIZLIB	Joe Warbington
jonathan.israel@vizlib.com	VIZLIB	Jonathan
martin.mahler@vizlib.com	VIZLIB	Martin Mahler
michael.nordstrom@vizlib.com	VIZLIB	Michael Nordström

At the bottom of the table, there are navigation arrows, a page indicator '1 - 4 of 4', a lock icon, and an 'Update Users' button.

To the right, a 'Users QVD' summary panel lists the users and their counts:

Rank	Name	Count
1	Joe Warbington	1
2	Jonathan	1
3	Martin Mahler	1
4	Michael Nordström	1

Vizlib Server

(Optional)

Tap into enterprise-grade writeback solutions in Qlik Sense! Advanced functionality and security when you input, edit and share data in your Qlik apps.

Close the analytics loop on a business-wide level—for accurate, trustworthy data that keeps the insights flowing, supports all business decisions and leads to the right documented actions faster.

Vizlib
Server

Write back directly to your database

Save time and improve efficiency – write back directly to your chosen SQL database or other business system that supports REST APIs. Collect and correct data while remaining in your Qlik app for more efficient workflows. And free up users' time by linking up your business tools.

Writeback data

Eliminate errors with locking function

Reduce errors and eliminate data chaos with the Locking feature. Lock the writeback destination, so only one person can edit specific data elements or rows at a time. Plus, a handy tooltip shows you who's locked the file and when.

More Features

+ Use numerous customisation options for styling and branding

+ Add comments at Sheet and/or Master Item level

+ Preserve selections for a particular case

+ Tie your comments to bookmarks and revisit them any time

+ Create and share bookmarks with other users

+ Add private notes that are visible only to you

+ Benefit from collapsed or expanded modes

+ Define and implement your business workflows within Qlik Sense

+ Leverage the rich commentary editor

+ Search through comments and conversations

+ Attach a chart image and a copy of the underlying data to emails

+ Attach fully threaded conversations to your bookmark for convenient sharing

+ Define your own security access rules to prevent unwanted users from accessing sensitive comments

+ Define and create your own communication channels to separate different users and quickly switch between parallel conversations

+ Use Teamwork Threads to group all relevant replies without clogging the chat and preserving context.

FAQs

Where can I find information on pricing?

Pricing, including all available user packages, is available for you to view in the Vizlib user portal - you need to login or click the link in your download email to access the portal: <https://www.vizlib.com/protected/upgrade>.

Can I purchase extensions or categories separately?

Every package is designed to deliver a powerful analytics experience and provide you with the tools and features you need to achieve your dataviz goals. This means you can purchase a subscription for the chosen package, but not individual extensions or extension categories. We are delighted to schedule tutorial and demo sessions to help you explore and understand the capabilities of each product better – please get in touch if you'd like to learn more!

Is Vizlib free to trial?

Vizlib is free to trial for up to 5 users.

One Vizlib user license allows an individual to use all Vizlib Extensions within the Qlik Sense environment based on their UserID, regardless of whether they're an app developer, app user or end user. A Vizlib license will account for all use cases for that one named user and is the same as an assigned Qlik Sense Token.

What's included in the subscription?

The subscription includes standard product support and any upgrades and additions we make to the package over time. Typically, we support new versions of Qlik Sense at the time of their release or within a few days.

Do you have a partner programme?

Yes! We run the Vizlib Partner Programme (VPP). To join the VPP you need to be a Qlik certified partner. For more information, please send us an email at support@vizlib.com and we'll be in touch shortly.

Will the extensions work in QAP/QSEoK (mashups)?

Yes!

Will the extensions work in Story Mode?

Yes!

Will the extensions work with nPrinting

Yes!

We build powerful value-added products for Qlik Sense.

Our feature-rich, intuitive Qlik Sense solutions empower data-driven organisations to extend their current analytics capabilities and uncover meaningful insights faster than ever before. We make data talk.

Leveraging our ready-to-use extension products, organisations go from mere data reporting to data storytelling in seconds, significantly boosting their time-to-market for new Qlik Sense projects. We are a valued partner to many of the world's leading businesses that seek fast, effective and branded solutions to boost data adoption across their organisation.

Once you experience Vizlib, there's no going back.
